

Renex Integrated Waste Treatment & Resource Recovery Facility

Construction of a new waste treatment facility in Dandenong South

In September 2012, Renex Group will start construction on Australia's first sustainable soil treatment facility at Ordish Road in Dandenong South. This is the first in a series of community bulletins to keep you informed about the development of the project. This exciting project will be completed in 2014. The Victorian Environment Protection Authority has assessed this facility against "best practice" standards, found it meets this standard and has given a Works Approval.

What does the new facility do?

Using the most advanced technology in the world, the new facility will treat soil from various construction projects around Victoria, so that it can be safely used again. By treating the soil in Renex's new facility, the amount of waste soil that is currently disposed in landfill sites will be reduced and therefore assist the Victorian EPA and the State Government of Victoria to achieve their zero waste to landfill target by 2020.

Dandenong South Integrated Waste Treatment Facility

You are invited to a

Community Information Forum

on Thursday 20 September, 2012

at the Drum Theatre
266 Lonsdale St Dandenong
From 7.00 - 8.30pm

Please come & meet the Renex team & hear more about the project.

What are the next steps?

Over the next 12 months, Renex will be constructing a large building of about 10,000m² on our land at 109-133 Ordish Rd, Dandenong South. The building will house all operations including storage and treatment of soil that is delivered to the facility.

We expect the facility to be commissioned and operating by early 2014.

Construction of building
(Start September 2012)

Storage of waste
(Start September 2013)

Treatment of waste
(Start Early 2014)

Proven Alternatives.

Renex Integrated Waste Treatment & Resource Recovery Facility

How will the facility affect you?

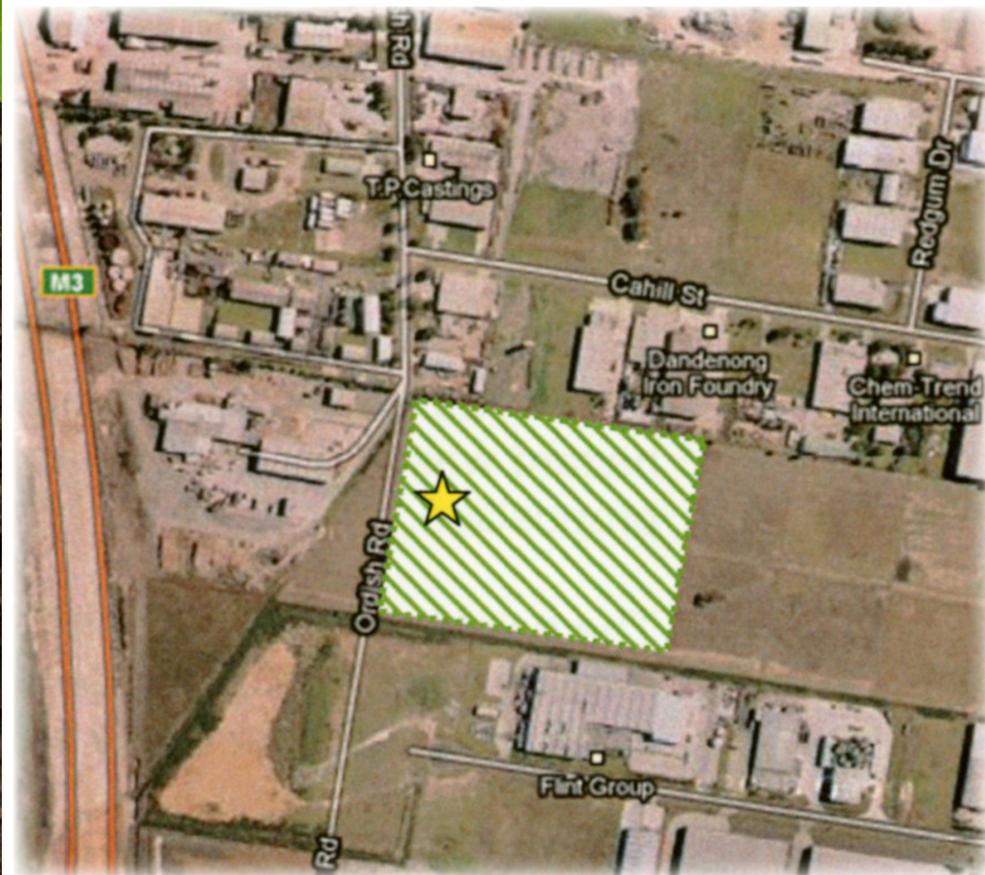

The new soil facility in Ordish Rd is located within the Industrial 2 Zone precinct of Dandenong South. The facility is fully self contained and residents will not be affected by its operations.

All operations at Renex will be carried out in accordance with strict government regulations to ensure the safe and reliable treatment of waste materials at all times with no adverse effects to the local environment.

Who is the Renex Group?

Renex is an Australian company which specialises in the treatment of waste materials so that they can be used again safely and beneficially. Our shareholders include the Cleantech Australia Fund and Centre for Energy and Greenhouse Technologies Fund (both managed by Cleantech Ventures) and Macquarie Bank.

Renex has chosen advanced treatment technology designed in Germany that will also be manufactured in Germany before being transported to the site.
